Casa Inc.

## “ReaPro” service starts under the partnership with RealNetPro Co.,Ltd.

We have partnered with RealNetPro Co.,Ltd. (Headquarters: Minato-ku, Tokyo, CEO Yoshiyuki Goto), which provides a real-time vacancy management system "Reapro", and started a rent guarantee service that utilizes the "WEB move-in application" function of Reapro.

By linking with the "WEB move-in application" function of Reapro, tenant applicants, intermediary companies, and management companies will not have to create a handwritten guarantee consignment application when using the rent guarantee service. As a result, smooth guarantee examinations are possible, and intermediary companies and management companies can improve operational efficiency.

"Reapro" is a system that makes it possible to reduce the work of management companies and brokerage companies and grasp information by utilizing the rental property information database.

For management companies, all managed properties can be stored in a database, and vacancy information can be updated in real time, recruitment drawings, and vacancy information can be listed and sent to the brokerage company.

In addition, by registering information on all managed properties (RealNetPro Co.,Ltd. will perform the registration on their behalf), they can use it to grasp the occupancy situation, obtain statistical information, and manage occupants.

In addition to coordinating with the management company, the brokerage company will be able to browse properties and output materials from a system.
